

P+P R-ALF Rescue Pulley System 5:1 10m #90603/10M/SP

Front Image

P+P Product Code

#90603/10M/SP

Description

The R-ALF Pulley is the latest innovation in Rescue, Confined Space Working and Work Suspension Systems.

The R-ALF Pulley has an over-speed brake built in so that the pulley will lock on and hold if a fall occurs. The load rated Becket Eye on the R-ALF means that it can be used in combination with Prusik Pulleys to obtain either a 3:1 or 5:1 Mechanical Advantage System. The unique design of the R-ALF, means that an internal brake is not required and therefore it is capable of several thousand cycles and many arrests (minimum 12 monthly service intervals apply). The system can also be used by the operator as a RPD (Rope Positioning System) in suspension. The R-ALF Pulley is rated for lifting materials.

Material Specification

Various

Attachment Points

Kwiklock offset 'D' karabiners as standard

Safe Working Load

250Kg

2 Person Rated

Size / Length

10m effective working length (60m of rope)

Other lengths are available

Standards

CE - PPE Test Directive

ANSI - Certified to Z359 :4:2007

In accordance with its policy of continuous improvement, P&P reserves the right to change specifications and designs without notice
