

## P+P Milan Rescue (65m) #90419/65MK2

### P+P Product Code

90419/65MK2

### Description

The P+P Milan Rescue is a lift to release then lower rescue system that eliminates the need for a cut rescue. The system features an Milan 2.0 HUB, which enables a rescuer to raise a suspended casualty sufficiently to release their fall arrest device then lower them to a point of safety. The supplied 3.5m Remote Capture Pole and P+P Super Clip is a safer alternative to climbing and in most cases enables the rescuer to access the casualty's attachment point without climbing and putting themselves at risk.

### Material Specification

9mm Super Static nylon rope

### Attachment Points

Alloy Kwiklok Karabiner and round anchorage sling

### Size / Length

65m

### Standards

EN341, EN1496
